OLIVER TREE MEME WHITE PAPER.

We aim to :

- Combine Fun and Utility: Meme culture can be blended with use cases to build a coin which can be funny and useful as well.

- Promote Sustainability: Promote environmental causes and community initiatives via transaction fees and partnerships.

- Empower the Community: Build a strong community by letting holders vote and compensating the early adopters of the project.

- Ensure Fairness: New projects are plagued with a poor distribution of tokens, so a fair launching and a deflationary model will suffice.

- Encourage Engagement: Humor and gamification strategies will be effective in targeting the users and building a good brand.

- Adapt and Grow: The utility of the coin and the ecosystem has always been sought to be changed because the crypto world is always changing.

This means that in general $OLVR seeks to uniquely combine the creation of a meme coin, the development of communities and environmental initiatives while bringing real utility to the ecosystem.
